

# **GEOMETRIC PATTERN MANDALA**

**WHALEARTS**

# WHAT YOU'LL NEED

- Paper
- A drawing pencil
- Felt-tipped pen
- Coloured pencils, paints or pastels
- Scissors
- Tape
- Ruler

## ADAPTATIONS

*You could also use different patterned paper to make the same effect! Instead of drawing your pattern, choose a few different kinds of coloured, patterned paper, cut out squares of equal size (5cm x 5cm) and arrange them in a funky pattern!*

*Also play around with size, I've used quite small squares (5cm x 5cm) but you could make a much larger geometric pattern mandala by making your squares larger! This might also be better if you have difficulty working with small scale!*

# STEP ONE

## DESIGNING YOUR PATTERNS

- Cut out at least six 5cm x 5cm squares of paper.
- Take one square and start designing a pattern. Use a combination of straight and curvy lines as well as circles and squares.
- Repeat this step for all 6 of your squares creating different patterns on each small square.

## STEP TWO

### *Laying out your pattern*

Choose a few of your small pattern squares and start playing around with a potential design.

### *Section out your paper*

Draw a line down the centre of your paper, top to bottom and side to side, so you've measured out the centre of your page.

## STEP THREE

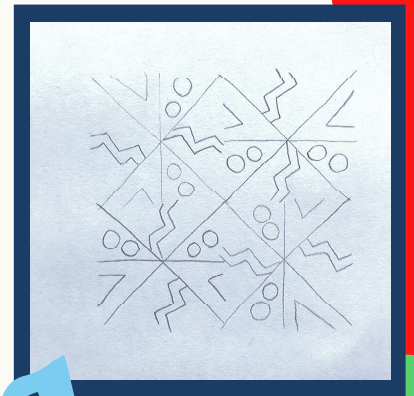

### ***Begin to trace!***

Once you've chosen your designs it's time to start putting it all together. Repetition will make the best pattern so I've chose to repeat the same small square in the centre 4 times.

### ***Tip!***

Stick your pattern to the back of your paper with a little bit of tape and press it against the window to trace. This will help you to see your design through the paper!

Keep tracing your pattern until  
you've created the centre of your  
mandala...

# STEP FOUR

Choose another patterned square and keep tracing until you fill your entire page...

# STEP FIVE

## PLANNING THE COLOURS

Colour in your patterned squares as guides.  
This way you will keep the repetition going and  
the final image will look more like a geometric  
pattern than a bunch of random shapes!

**YOUR  
COLOUR  
GUIDE**

# STEP SIX

## THE SOOTHING PROCESS OF COLOURING IN!

*Now it's time to start colouring in your entire image. Use your colour guides to keep you on track!*

**KEEP GOING...**

# STEP SEVEN

## SMARTENING UP

Trim off any untidy edges and go over the pencil lines with a black felt-tipped pen to finish it off!

# AND THERE YOU HAVE IT!

Colouring in is soothing. Take your time once you have designed your pattern, come back to the colouring in stage if you need a break...
