

you will need:

WHITE CARD
BLACK PEN
SCISSORS
TAPE
EITHER:

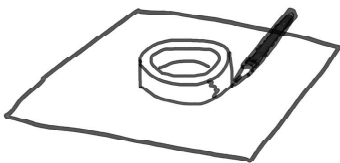

- WOODEN KEBAB SKEWERS
- DRINKING STRAW
- STRING
- GLUE

Make Your Own Thaumatrope

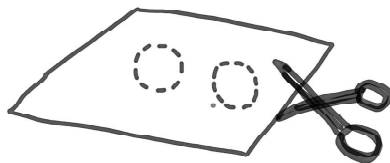

A THAUMATROPE IS A TOY THAT WAS POPULAR IN THE 19TH CENTURY, WHERE A DISC WITH AN IMAGE ON EACH SIDE ARE ROTATED QUICKLY TO CREATE THE ILLUSION OF MOVEMENT...

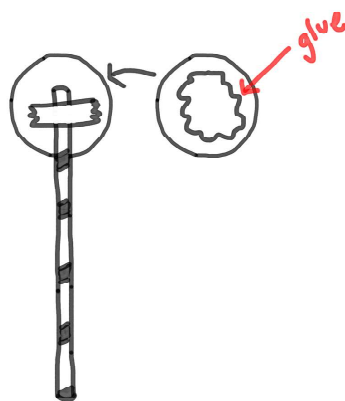

1. Draw around your tape on the card (twice)

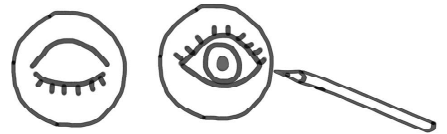

2. Cut out both circles

4. Tape one circle to the straw/skewer. Then glue the other circle on with the drawings facing outwards

3. Now draw an image on each circle - the drawings should relate to each other - like a waving hand or blinking eye!

5. YOU'RE DONE!
(you should roll the straw between your hands to see the animation)

ALTERNATIVE: Just use one circle, with an image on each side, make holes each side, tie a bit of string each side...
